Let's care for tomorrow.

Key responsibilities/What you do

Software developer is responsible for gathering user requirements, defining system functionality and writing code in various languages. The candidate is familiar with the software development life cycle (SDLC) from preliminary system analysis to tests and deployment. You will be part of the software development team to build high-quality, innovative and fully performing software that complies with coding standards and technical design. You'll be playing a key role in the design, coding, testing and maintenance of software systems. The programs developed are likely to help businesses be more efficient and provide a better service.

- Leading mobile apps development to support company's digital strategy in alignment in compliance with regional and group standards.

- undertake overall mobile application development by following the standard software development lifecycle.
- working close with IT project manager, productions, and operations to understand and document requirements for solutions development and coding.
- Develop new APIs if required by using common tools and methods in compliance with Group and Regional
- Explore and use regional API & Global Digital Factory to drive standard digital strategy.
- Explore Agile Delivery Platform (ADP) and Container Runtime Platform (CRP)
- Participate in regional API community.
- drive DevSecOps implementation.
- create the test plan and conduct testing before going live to app stores.
- document and maintain existing mobile applications.
- update/ upgrade existing solutions to meet business requirement.
- work with other developers and business partners for systems integration.
- keep up to date on the latest industry trends in the mobile technologies.
- troubleshoot/ debug programs issues raised according to SLA.
- ensure software is updated with latest features and patches.

- report development progress to IT development manager and IT head regularly and on ad-hoc

- write detailed documents related and do training if it is required.
- Undertake other duties and specific projects as directed.

Key requirements/What you bring

- Minimum of 2+ years of working experience in software development and coding
- Proven work experience as a Software Developer
- Experience designing interactive applications.
- Experience in Flutter (Dart), Java/Kotlin for Android, Basic HTML (HTML5 + CSS/SASS + JavaScript), Angular, Bootstrap, jQuery Framework, ASP.NET Framework, Spring Boot (Java), VB.NET & C#.NET Framework, Crystal Report
- Experience in relational databases (SQL Server), query and stored procedure programming
- Experience developing API in Spring Boot (Java), ASP.NET (C#), C#.NET Core
- Bachelor's degree or above in Computer Science, Engineering, or relevant fields
