About Company

Allianz Insurance Laos is one of the most trusted insurance in Laos, established since 1990. Caring for our employees, their ambitions, dreams and challenges, is what makes us a unique employer. Together we can build an environment where everyone feels empowered and has the confidence to explore, to grow and to shape a better future for our customers and the world around us. Join us. Let's care for tomorrow.

Key responsibilities/What you do

Software developer is responsible for gathering user requirements, defining system functionality and writing code in various languages. The candidate is familiar with the software development life cycle (SDLC) from preliminary system analysis to tests and deployment. You will be part of the software development team to build high-quality, innovative and fully performing software that complies with coding standards and technical design. You'll be playing a key role in the design, coding, testing and maintenance of software systems. The programs developed are likely to help businesses be more efficient and provide a better service.

- Undertake overall development in windows form and web application following the standard software development lifecycle.

- Working close with IT project manager, productions, and operations to understand and document requirements for solutions development and coding.
- Create high quality software based on business-driven goals in a timely manner.
- Document, maintain existing website, windows forms, and web applications.
- Update/ upgrade existing solutions to meet business requirement.
- Work with other developers and business partners for systems integration
- Troubleshoot/ debug systems issues raised according to SLA.
- Ensure software is updated with latest features and patches.
- Write detailed documents related and do training if it is required.
- Report development progress to IT development manager and IT head regularly and on ad-hoc
- Undertake other duties and specific projects as directed.

Key requirements/What you bring

- Minimum of 2+ years of working experience in software development and coding
- Proven work experience as a Software Developer
- Experience designing interactive applications.
- Experience in Visual Studio (VB.NET, C#, LINQ), HTML5, CSS, SCSS, Bootstrap, Angular, ASP.NET Framework and ASP.NET Core, Flutter (Part Website), Java, Android Studio, Crystal report, Json Convert
- Experience in relational databases (SQL Server, SQLite), query and stored procedure programming
- Experience developing API in REST and REST-FUL APIs in ASP.NET Framework and ASP.NET Core
- Document requirements and technical/user documents
- Bachelor's degree or above in Computer Science, Engineering, or relevant fields

Key benefits/What we offer
